INTRODUCTORY LETTER

*To the Honourable F. COCHRANE,
Minister of Lands, Forests and Mines.*

SIR,—The need for a consolidated or General Index of the Reports of the Bureau of Mines has been apparent for some time, and is being more and more felt as the reports increase in number. The Bureau's annual volumes, beginning with its establishment in 1891, have chronicled the progress of the mining industry in Ontario; have recorded the discovery and development of the mineral fields which have successively claimed attention; have embodied the results obtained by competent investigators into the geology and mineralogy of the newer and less-known portions of the Province, and have, from year to year, endeavoured to correlate the mineral arts of Ontario with the steady advances everywhere being made in knowledge and in practice.

It has been the aim of the Bureau to carry on its work in such a way as to fulfil the object for which it was created, which, in the language of the Statute of 1891,* is "to aid in promoting the mining interests of the Province."

Necessarily, the methods adopted by the Bureau to this end have been both varied and practical in their nature. Working out the geology and defining the limits of mineral-bearing districts; ascertaining the extent and characteristics of the formations found to carry ores or mineral substances of any useful kind, and describing them so as to enable men unskilled in technical terms, as well as trained geologists, to recognize them in the field; collecting statistics of output and value of the mineral production; investigating problems of treatment and the possibility of utilizing neglected or waste materials; these and similar means have been employed as occasion called for, in the hope of obtaining results that would subserve the mineral industries of the Province and be of use to the prospector, the miner, and the investor. But no hard and fast line can be drawn between the "practical" and the "scientific." The practical is but the scientific put into use, and it often happens that knowledge won for its own sake, without hope or expectation of reward, and which does not appear to have any immediate economic bearing, proves sooner or later to be intrinsically utilitarian.

Accordingly, the Bureau has believed it advisable not to neglect certain of its functions, which may perhaps be regarded as less severely practical than those already mentioned. The geology of a great part of Ontario, for instance, is of pre-Cambrian age. Fossiliferous evidence being absent, and lithological characteristics often of uncertain interpretation, the determination and classification of the various formations and the ascertaining of their relationships to one another present many difficulties. Yet the successful decipherment of the geological record may shed much light upon questions arising in the actual exploitation of mineral deposits, and may provide or suggest a solution of problems often perplexing to the mining engineer. An instance in point is afforded by the Cobalt mining district. The interpretation of the geological phenomena of that region by Professor W. G. Miller, the Provincial Geologist, and his assistant, Mr. Cyril W. Knight, during the short period of the field season of 1904, involving, as it did, a revision of the work and conclusions of previous observers in districts containing the same rocks, provided a basis for working the deposits of that unique field which has proven of the utmost service in actual

*54 Vict., chap. 8, sec. 9.

practice. Nor is it upon such occasions only that geology comes to the aid of industry. It has happened more than once that a geologist, intent only upon observing and correlating the rock formations of the district under his examination, and paying little or no regard to economic minerals or their indications, has produced a report and map which later have served as an invaluable guide to prospectors in the same field, upon valuable minerals being discovered therein.

"Knowledge," says Dr. Johnson, "is of two kinds. We know a subject ourselves, or we know where we can find information upon it." The reports of the Bureau, containing, as they do, a fairly complete record of the Province's mineral industry since they began to be published, as well as a large amount of information concerning the geology and mineral resources of the Province, are naturally in constant demand by those who are interested in particular minerals, deposits, or districts, in the possible and actual resources of the Province or any part of it, in the origin and progress of any branch of the mining industry, or in any other of the thousand and one features with which the reports must necessarily deal. To know where such information can be obtained when wanted is the really important thing, for no one memory can be trusted to contain and reproduce correctly such a mass of detail.

The General Index submitted herewith covers the Report of the Royal Commission on the Mineral Resources of Ontario, published in 1890, the first sixteen annual Reports of the Bureau of Mines, beginning with 1891 and ending with 1907, and several bulletins on special topics published by the Bureau at various times. The Report of the Royal Commission, though published before the Bureau of Mines was established, naturally claims a place in the Index, since it comprehends most of the information of a similar character available at the time it was printed, as well as much valuable historical data. It was upon the recommendation of the Commission that the Bureau was created.

From the First up to and including the Seventh of the Bureau's reports, namely, from 1891 to 1897, the volumes bear on the title page the year to which the Report particularly applies, and for which the statistics of output, etc., are given. A change was made in 1898 which caused the reports to bear the year in which they were actually printed. The Report for 1897 has "1898" on the title-page, but "1897" on the cover of the cloth-bound copies. The next, or Eighth Report, being for the year 1898, is marked "1889" both on title-page and cover, and this practice has been followed since that time. The change has led to some confusion in referring to the reports, and in citing them it is better to do so by the number of the volume than by the year. Thus the Report carrying on the cover the date "1896" is the Sixth Report, but the volume with the date "1904" is the Thirteenth, not the Fourteenth. Each volume is provided with an Index as well as a Table of Contents, and in this way the possessor of a set of the Bureau's Reports is able, by searching, to ascertain what of interest or value they contain on any given mineral, locality, or topic. Such information may be fragmentary and incomplete, or it may be full and definite, exactly what the inquirer is looking for; or it may give some clue or hint by means of which further and more complete data may be obtained from other sources. But the sixteen indexes to the sixteen Reports necessitate sixteen separate searches in order to locate everything that may be in all the Reports on any given subject, and time is money in this busy age. All the references to the subject in the whole sixteen volumes are now brought together in the General Index, and in one search instead of sixteen the inquirer can complete his quest.

Nor are convenience and the saving of time the only advantages which the General Index possesses over the indexes to the individual volumes. The separate indexes are not the work of one hand, nor are they compiled on a common plan. Hence they differ in perspective and detail, and to some extent are of unequal value. To be able to make a good index of a volume dealing in technical terms and with special branches of knowledge, presumes an extensive and accurate acquaintance, both with the

terminology and the subject matter of the volume. If this is absent the sense of proportion is wanting, important matters are apt to be slighted and trifling ones given too much space. The General Index, being the work of one man only, and being compiled, not from the indexes of the separate volumes, but from the text of the Reports themselves, is uniform in plan throughout, and is made with an adequate knowledge of geology, mineralogy, palæontology, metallurgy, mining and the other sciences and subjects which form the bulk of the matter contained in the several Reports. In some measure it is more than an index; it is a summary of the information which the Reports comprise, and will, it is hoped, by making the results obtained by the Bureau more accessible, render them more useful.

It will probably be found that the Index contains mistakes. The reports themselves are not free from mistakes. Errors creep in through defects of memory, manuscript and proof-reading. Statements accepted in good faith at second-hand, when traced to their original source, are found to have been incorrectly quoted or condensed, and errors of fact occasionally occur for which reasonable explanation is wanting. Even broken or imperfect type or incorrect spelling may lead to inaccuracy of statement. Machine-set type is prolific of inaccuracies, since the correction of one printer's error, especially if the number of lines be increased or diminished, may necessitate the re-setting of a whole paragraph, in which fresh errors may be made, requiring fresh corrections.

The Bureau's Reports have one and all been prepared, edited and proof-read, with much care, and the number of errors, small and great, is probably not in excess of what would be found in any other sixteen volumes of similar character. Wherever possible, errors in orthography or nomenclature have been corrected in the Index. If mistakes are detected in the Index itself, the Bureau will be glad to be notified of them, so that they may be rectified in any subsequent edition.

The earlier volumes of the Bureau are entirely out of print, and indeed this is the case with many of the later volumes as well. The only report of which any considerable number of copies remains on hand is the Tenth, printed in 1901. An extra edition was published for distribution at the Pan-American Exposition, held at Buffalo, N.Y., in that year, of which some hundreds are still left.

The Bureau has from the beginning supplied its Reports to a considerable number of public and educational institutions, such as universities, technical colleges, engineering societies, etc., not only in Canada, but also in the United States and Great Britain, so that full sets of its volumes may be consulted in many, if not all, of the leading cities and centres of the mining industry in these countries. To all such copies of the General Index will be sent. It is no longer possible to supply full, or even reasonably complete sets of the reports, but the Bureau will be glad to fill up gaps in public and private libraries to the extent of its ability.

Owing to the fact of the earlier volumes being difficult to procure, the Index has been made more complete than would otherwise have been deemed necessary, in the hope that the information supplied may, in many cases, be a useful substitute for that contained in the volumes themselves.

The edition of the General Index is limited to one thousand copies, all bound in linen cloth.

It only remains to say that the author of the Index, Mr. Frank J. Nicolas, of Ottawa, has performed his task with rare assiduity, diligence and success. His qualifications for the work have proven all that could be desired.

Your obedient servant,

THOS. W. GIBSON,
Deputy Minister of Mines.

Office of the Bureau of Mines,
Toronto, 26 January, 1909.

CONTENTS

OF THE

REPORTS OF THE BUREAU OF MINES

Volumes I to XVI (1891-1907)

Vol. I, 1891

	PAGE.
Letter of Transmission. By Archibald Blue	1
Report of the Bureau of Mines. By Archibald Blue	3-48
Artesian Wells. By Thos. W. Gibson	49-62
The Laurentian and Huronian Systems north of Lake Huron. By Dr. Robert Bell	63-94
Structural Materials. By Archibald Blue	95-114
Natural Gas. By Archibald Blue	115-164
The Minerals of Ontario. By Archibald Blue	165-179
Peat, Its Use, and Value for Fuel. By Thos. W. Gibson	180-211
Technical Instruction. By Thos. W. Gibson	212-217
Alexander Murray, F.G.S., F.R.S.C., C.M.G. By Robert Bell	218-222
Report of the Inspector of Mines. By A. Slaght	223-247

Vol. II, 1892

Letter of Transmission. By Archibald Blue	3
Report of the Bureau of Mines. By Archibald Blue	5-12
Iron-making in Ontario. By Archibald Blue	13-30
The Iron Ores of Ontario. By Archibald Blue	31-82
Treating Iron Ores and Metallic Iron. By Archibald Blue	83-96
Facts and Opinions on the Iron Industry. By Archibald Blue	97-122
Locations for Pig Iron Production. By John Birkinbine	123-128
Nickel and Copper. By Archibald Blue	129-148
The Metallurgy of Nickel (Translation). By Mons. David Levat	149-162
Constitution of Nickelferous Pyrrhotite. By Dr. Stephen H. Emmens	163-166
Some New Nickel Minerals. By Dr. Stephen H. Emmens	167-170
A Pioneer's Mining Experiences on Lake Superior and Lake Huron. By Walter William Palmer	171-178
New Sources of Platinum. By Dr. Stephen H. Emmens	179-180
Lithographic Stone. By Dr. C. W. Volney	181-184
Ontario's Minerals at the World's Fair. By Dr. A. P. Coleman	185-194
The Utilization of Peat:—	
The Peat Industry in Canada. By R. W. Ells	195-202
Peat as a Fuel. By Thomas W. Gibson	203-210
Peat in Europe To-Day. By Thomas W. Gibson	211-220
The Mining Laws of Ontario. By Archibald Blue	221-229
Report of The Inspector of Mines. By A. Slaght	231-254
Special Report on the Accident at the Blezard Mine. By A. Slaght	255-257

Vol. III, 1893

Letter of Transmission. By Archibald Blue	3-4
Report of the Bureau of Mines. By Archibald Blue	5-10
The Gold Fields of Ontario. By Archibald Blue	11-61
Copper at Point Mamainse. By Archibald Blue	62-88
Actinolite, Asbestos and Talc. By Archibald Blue	89-102
Vitrified Brick for Street Pavements. By Thos. W. Gibson	103-132
Rocks and Building Stone. By Dr. A. P. Coleman	133-136

Lithographic Stone. By Archibald Blue	137-138
Moss Litter. By Edward Jack	139-144
Iron Trade of the United States. By Archibald Blue	145-146
Nickel Steel for Armor. By Archibald Blue	147-163
Diamond Drills. By Archibald Blue	164-166
Mining Accidents. By Thos. W. Gibson	167-177
Kingston School of Mining. By Archibald Blue	178-180
Report of the Inspector of Mines. By A. Slaght	181-199

Vol. IV, 1894

Letter of Transmission. By Archibald Blue	3-5
General Introduction. By Archibald Blue	7-34
Gold in Ontario: Its Associated Rocks and Minerals. By Dr. A. P. Coleman.	35-100
The Hinterland of Ontario. By Thos. W. Gibson	101-138
Calcium Carbide and Acetylene Gas. Introduction by Archibald Blue	139-141
The Commercial Synthesis of Illuminating Hydro-Carbons. By Prof. Vivian B. Lewes	142-151
The Carbides and Acetylene Commercially Considered. By T. L. Willson and J. Suckert	152-166
Diamond Drill Explorations. By Archibald Blue	167-176
Nickel and Its Uses. Introduction by Archibald Blue	177-181
Nickel and Nickel Steel. By Francis L. Sperry	182-194
Nickel Steel: Its Special Value for Armor. By Capt. W. H. Jaques	194-198
Mining Accidents. By Thos. W. Gibson	199-215
Summer Mining Schools. By Archibald Blue	216-222
Fifth Report of the Inspector of Mines. By A. Slaght	223-253
Maps Accompanying the Report:	
(1) Map of Southeastern Part of Rainy River District exhibiting the country in the vicinity of Rainy Lake and River Seine, Scale 2 miles=1 inch.	
(2) Map of Part of Rainy River District, exhibiting the country in the vicinity of Manitou, Eagle and Wabigoon Lakes, Scale 2 miles=1 inch.	

Vol. V, 1895

Letter of Transmission. By Archibald Blue	3-6
General Introduction. By Archibald Blue	7-46
Second Report on the Gold Fields of Western Ontario. By Dr. A. P. Coleman.	47-106
A Tour of Inspection in Northwestern Ontario. By Archibald Blue	107-190
The New Ontario. By Archibald Blue	191-211
The Mining Schools. By Archibald Blue	212-220
Work with the Diamond Drill. By Thos. W. Gibson	221-234
Mining Accidents. By Thos. W. Gibson	235-240
Report on a Section of the Height of Land Region Northeast of Lake Superior. By E. B. Borron	241-258
Sixth Report of the Inspector of Mines. By A. Slaght	259-287

Vol. VI, 1896

Letter of Transmission. By Archibald Blue	3-6
General Introduction. By Archibald Blue	7-70
Third Report on the West Ontario Gold Region. By Dr. A. P. Coleman.	71-124
The Story of Silver Islet. By Archibald Blue	125-158
Anthraxolite or Anthracitic Carbon. By Dr. Arthur P. Coleman	159-161
Chemical Composition of the Anthraxolite. By W. Hodgson Ellis	162-166
Geology of the Nipissing-Algoma Line. By Edward M. Burwash	167-184
Moss Litter. By Thos. W. Gibson	185-192
Mining Schools in Ontario. By Archibald Blue	193-198
Mineral Collections for Summer Mining Schools. Introduction by A. Blue ..	199-200
Part I. Minerals. By W. G. Miller	200-205
Part II. Catalogue of Minerals in the Collection. By Prof. W. L. Goodwin	206-229
Part III. Rocks and Rock Structures. By W. G. Miller	229-236
Some Notes on the Milling of Gold Ores. By John E. Hardman	237-243
Seventh Report of the Inspector of Mines. By A. Slaght	245-281

Maps:

- Map of Nipissing-Algonia line, after page 176.
 Geological and topographical map of the Northern part of the Lake of the Woods and Adjacent Country in the Rainy River District.
 Geological and topographical map of part of the Thunder Bay District from Thunder Bay to the Western side of Moss township, including Dog Lake, Lake Shebandowan and Lac des Mille Lacs.

Vol. VII, 1897

Part I

Prefatory Note. By Archibald Blue	ix-x
Report of the Bureau of Mines: Introduction. By Archibald Blue	1-6
Statistics of Mining Lands and Minerals. By Archibald Blue	7-34
Mines of Northwestern Ontario. By James A. Bow	35-84
Mines of Eastern Ontario. By Aaron Slaght	85-100
Michipicoton Mining Division. By David G. Boyd	101-106

Part II

Fourth Report on the West Ontario Gold Region. By Dr. A. P. Coleman:..	109-145
Notes on the Petrology of Ontario. By Dr. A. P. Coleman	145-150
Clastic Huronian Rocks of Western Ontario. By Dr. A. P. Coleman	151-160
Geology of Base and Meridian Lines in Rainy River District. By William Arthur Parks	161-183
Michipicoton Mining Division. By Arthur B. Willmott	184-206

Part III

Economic Geology of Eastern Ontario:	
Corundum and other Minerals. By Willet G. Miller	207-238
Analyses of Corundum and Corundum-bearing Rock. By W. L. Goodwin	238-239
The Concentration of Corundum. By Courtenay De Kalb	240-250
Water Powers of Ontario. By Thomas W. Gibson	251-256
Placer Gold in Vermilion River. By Arthur H. Gracey	256-259
Mining Schools and Classes:	
Kingston School of Mining. By W. L. Goodwin	259-263
School of Practical Science. By J. Watson Bain	263-265

Maps:

- Map of Base and Meridian lines in the Rainy River District, after page 172.
 Map of part of the Michipicoton Mining Division, after page 188.
 Map of parts of the counties of Hastings and Renfrew, after page 206.
 Plan showing gold-bearing sands on Vermilion River, after page 236.

Vol. VIII, 1899

Part I

Prefatory Note. By A. Blue	ix
Introduction. By A. Blue	5-8
Mineral Industries of Ontario. By A. Blue	9-28
The Condition of Ontario Mines. By Courtenay De Kalb	29-48
Mines of Northwestern Ontario. By James A. Bow	49-99
Michipicoton Mining Division. By David G. Boyd	100-105
Nickel Extraction by the Mond Process. By Sir William Chandler Roberts-Austen	106-120

Part II

Copper Regions of the Upper Lakes. By Dr. A. P. Coleman	121-174
The Nipissing-Algonia Boundary. By William Arthur Parks	175-196
Goulais River to Dalton. By W. A. Charlton, Jr.	197-204
Corundum and other Minerals. By Willet G. Miller	205-240
Corundum in Ontario. By Archibald Blue	241-249
Corundiferous Nepheline Syenite. By Dr. A. P. Coleman	250-253
Michipicoton Iron Range. By A. P. Coleman and A. B. Willmott	254-258
Copper in Parry Sound District. By Dr. A. P. Coleman	259-262

Lower Seine Gold Mines. By James A. Bow	263-274
Notes on Working Mines. By J. Watson Bain	275-279
Summer Mining Classes. By J. Watson Bain and W. L. Goodwin	280-283
Provincial Assay Office. By J. Walter Wells	284-289

Maps:

- Map of Mining Claims in vicinity of Wawa Lake, after page 120.
 Map of the Western Part of Michipicoton Mining Division, after page 126.
 Map of Abitibi River and The Nipissing-Algomina Line, after page 200.

Vol. IX, 1900

Introduction. By Archibald Blue	5-8
Mineral Industries of Ontario. By Archibald Blue	9-34
Mines of Northwestern Ontario. By James A. Bow	35-88
Mines of Eastern Ontario. By Courtenay De Kalb	89-111
Michipicoton Mining Division. By D. G. Boyd	112-118
Are there Diamonds in Ontario? By Archibald Blue	119-124
Niven's Base Line 1899. By William A. Parks	125-142
Copper and Iron Regions of Ontario. By Dr. A. P. Coleman	143-191
Minerals of Ontario with Notes. By Willet G. Miller	192-212
A Sketch of the Nickel Industry. By J. W. Bain	213-224
The Mines Law of Ontario. By Archibald Blue	225-229

Maps:

- Map of parts of the Districts of Algoma and Nipissing, showing the Upper Basins of the Moose, Ottawa and Michipicoton Rivers.
 Map of Sudbury Mining District, showing location of Mines and Mining Properties.

Vol. X, 1901

Introductory Letter. By Thos. W. Gibson	5-8
Statistics for 1900. By Thos. W. Gibson	9-60
Metallurgical Industries at Sault Ste. Marie. By Frank N. Speller	61-68
Mines of Northwest Ontario: Part I. By J. A. Bow	69-90
Mines of Northwest Ontario: Part II. By W. E. H. Carter	90-112
Mines of Eastern Ontario. By C. De Kalb	113-136
Michipicoton Mining Division. By D. G. Boyd	137-144
Mining Land Agencies. By Thos. W. Gibson	145-148
Provincial Assay Office, Belleville. By J. Walter Wells	148-150
The Vermilion River Placers. By A. P. Coleman	151-159
Iron Ores of Nipissing District. By Willet G. Miller	160-180
Iron Ranges of the Lower Huronian. By A. P. Coleman	181-212
The Iron Belt on Lake Nipigon. By J. W. Bain	212-214
Sea Beaches of Eastern Ontario. By A. P. Coleman	215-227

Maps:

- Map of part of the District of Nipissing to accompany Report by W. G. Miller on the Iron Ores of Nipissing, Scale 4 miles to 1 inch.

Vol. XI, 1902

Introductory Letter. By Thos. W. Gibson	3-8
Statistics for 1901. By Thos. W. Gibson	9-60
Summer Mining Schools. By W. L. Goodwin	61-69
Michipicoton Mining Division. By D. G. Boyd	70-75
Provincial Assay Office. By J. Walter Wells	76-79
Mining Land Agencies. By Thos. W. Gibson	80-82
Ontario at the Pan-American. By Frank N. Speller	83-90
The Mineral Industries of Sault Ste. Marie. By A. B. Willmott	91-100
Arsenic in Ontario. By J. Walter Wells	101-122
The Corniferous Exposure in Anderdon. By Rev. Thos. Nattress	123-127
Iron Ranges of Northwestern Ontario. By A. P. Coleman	128-151
The Michipicoton Iron Region. By A. P. Coleman and A. B. Willmott	152-185
The Eastern Ontario Gold Belt. By Willet G. Miller	186-207
Syenites near Port Coldwell. By A. P. Coleman	208-213
Lake Temiscaming to the Height of Land. By Willet G. Miller	214-230
The Mines of Ontario. By W. E. H. Carter	231-298

Maps:

- (1) Geological map of the Michipicoton Iron Range. By A. P. Coleman and A. B. Willmott, Scale 40 chains=1 inch.
- (2) Map of the Helen Iron Mine. By A. B. Willmott, Scale 300 feet to 1 inch.
- (3) Outline map of the Eastern Ontario Gold Belt to accompany Report of W. G. Miller, Scale 4 miles to 1 inch.

Vol. XII, 1903

Introductory Letter. By Thos. W. Gibson	3-6
Statistics for 1902. By Thos. W. Gibson	7-53
Summer Mining Schools. By W. L. Goodwin	54-61
Michipicoton Mining Division. By D. G. Boyd	62-67
Provincial Assay Office. By J. Walter Wells and A. G. Burrows.....	68-72
Mines of Northwestern Ontario. By Willet G. Miller	73-107
Mines of Eastern Ontario. By W. E. H. Carter	108-140
Fossiliferous Rocks of Southwest Ontario. By W. A. Parks	141-156
Up and Down the Mississaga. By L. C. Graton	157-172
Round Lake to Abitibi River. By L. L. Bolton	173-190
Peat Fuel: Its Manufacture and Use. By W. E. H. Carter	191-234
The Sudbury Nickel Deposits. By A. P. Coleman	235-303
Iron Ranges of Northern Ontario. By Willet G. Miller	304-317
Moose Mountain Iron Range. By C. K. Leith	318-321
Magnetic Concentration of Iron Ores. By J. Walter Wells	322-342

Maps:

- (1) Geological map of Copper Cliff Mine and vicinity, by A. P. Coleman.
- (2) Geological map of Stobie and Frood Nickel Mines, by A. P. Coleman.

Vol. XIII, 1904

Part I

Introductory Letter. By Thos. W. Gibson	x-xiii
Statistical Review. By Thos. W. Gibson	1-45
Michipicoton Mining Division. By D. G. Boyd	46-49
Provincial Assay Office. By A. G. Burrows	50-51
Summer Mining Schools. By W. L. Goodwin	52-57
Mines of Western Ontario. By W. E. H. Carter	58-87
Mines of Eastern Ontario. By Willet G. Miller	88-95
Cobalt-Nickel Arsenides and Silver. By Willet G. Miller	96-103
The Abitibi Region. By George F. Kay	104-134
Economic Resources of Moose River Basin. By James Mackintosh Bell.....	135-179
Devonian Fauna of Kwataboahegan River. By William Arthur Parks	180-191
The Northern Nickel Range. By A. P. Coleman	192-222
The Iron Belt West of Hutton. By M. T. Culbert	222-224
The Iroquois Beach in Ontario. By A. P. Coleman	225-244

Maps:

- (1) Map of Northern Nickel Range, by A. P. Coleman, Scale 2 miles to 1 inch.
- (2) Map of Northern Parts of the Districts of Algoma and Nipissing, to accompany Report of J. M. Bell, Scale 8 miles to 1 inch.
- (3) Map of Lake Iroquois, by A. P. Coleman; Parts in New York after H. L. Fairchild.

Part II

Preface. By Willet G. Miller	v-vii
The Limestones of Ontario. By Willet G. Miller	1-126

Vol. XIV, 1905

Part I

Statistical Review. By Thos. W. Gibson	1-36
Summer Mining Classes. By W. L. Goodwin	37-42
Mines of Western Ontario. By W. E. H. Carter	43-75
Mines of Eastern Ontario. By E. T. Corkill	76-88

Petroleum and Natural Gas. By E. T. Corkill	89-117
Cement Industry of Ontario. By P. Gillespie	118-183
Explorations in Abitibi. By James G. McMillan	184-212
Agricultural Resources of Abitibi. By Archibald Henderson	213-253
Loon Lake Iron-Bearing District. By W. N. Smith	254-260
Boston Township Iron Range. By Willet G. Miller	261-268
Pre-Cambrian Nomenclature. Report of International Committee on Lake Superior Geology	269-277
Iron Ranges of Michipicoten West. By J. M. Bell	278-355
Map of the Michipicoten Iron Range west of the Magpie River, to accompany Report by James Mackintosh Bell, geologically colored, scale 2 miles to 1 inch.	

Part II

The Cobalt-Nickel Arsenides and Silver Deposits of Temiskaming. By Willet G. Miller	1-62
Maps:	
(1) Geological Map of the Cobalt-Nickel-Arsenic-Silver area.	
(2) Sketch map showing location of veins in Coleman.	

Part III

The Sudbury Nickel Field. By A. P. Coleman	1-183
Maps:	
(1) Geological Map of Sudbury Nickel Region, Scale $1\frac{1}{2}$ miles to 1 inch.	
(2) Map of Copper Cliff Mine and vicinity.	
(3) Map of Stobie and Frood Nickel Mines.	

Vol. XV, 1906

Part I

Statistical Review. By Thos. W. Gibson	1-38
Summer Mining Classes. By W. L. Goodwin	39-46
Mines of Ontario. By E. T. Corkill	47-107
Natural Gas and Petroleum. By Eugene Coste	108-115
Exploration in Mattagami Valley. By H. L. Kerr	116-135
Agricultural Resources of Mattagami. By Archibald Henderson	136-155
The Animikie Iron Range. By L. P. Silver	156-172
Iron Ranges of Eastern Michipicoten. By A. P. Coleman	173-206
Maps:	
(1) Map of the Animikie Iron Range near Port Arthur, Ontario, geologically colored. Scale 1 mile to 1 inch. To accompany Report by L. P. Silver.	
(2) Map of the Iron Ranges of Southeastern Michipicoten, geologically colored. Scale 2 miles to 1 inch. To accompany report by A. P. Coleman.	

Part II

Preface. By Willet G. Miller	1-2
Clay and the Clay Industry of Ontario. By M. B. Baker	3-120

Vol. XVI, 1907

Part I

Introductory Letter. By Thos. W. Gibson	2
Statistical Review. By Thos. W. Gibson	3-48
Summer Mining Classes. By W. L. Goodwin	49-54
Mines of Ontario. By E. T. Corkill	55-91
Oil and Gas in Kent. By C. W. Knight	92-104
I. Iron Ranges East of Lake Nipigon. By A. P. Coleman	105-135
II. Iron Ranges East of Lake Nipigon. By E. S. Moore	136-148
Iron Pyrites in Ontario. By E. L. Fraleek	149-201
The Larder Lake District. By R. W. Brock	202-218
Lake Abitibi Gold Deposits. By Willet G. Miller	219-220
Grenville-Hastings Unconformity. By Willet G. Miller and Cyril W. Knight.	221-223

- Map:**
 Geological sketch map, Larder Lake Region, Scale 1 mile to 1 inch, to accompany Report by R. W. Brock.

Part II

Preface. By Willet G. Miller	ix-xvi
The Cobalt-Nickel Arsenides and Silver Deposits of Temiskaming (Third Edition):	
Chap. I. Cobalt-Nickel Arsenides and Silver. By Willet G. Miller	1-67
Chap. II. The Working Mines of Cobalt. By E. T. Corkill	68-116
Chap. III. Other Temiskaming Cobalt Areas:	
Report on Montreal River and Temagami Forest Reserve. By Cyril W. Knight	117-128
Notes on the Bloom Lake Area. By W. R. Rogers	129-130
A Mineralized Area in the townships of Casey and Harris. By R. E. Hore.	131-134
A Part of the Area south of Lake Wendigo. By R. E. Hore	135-137
The Area west of Bay Lake on the Montreal River. By J. S. DeLury... ..	138-146
Cobalt-Silver Veins south of the Township of Lorrain. By Cyril W. Knight ..	147-149
Chap. IV. Lake Superior Silver Deposits. By Willet G. Miller	150-170
Appendix I: List of Mining Companies incorporated in connection with Cobalt. By Willet G. Miller	171-181
Appendix II: The Early History of the Cobalt Industry in Saxony. Translated by G. R. Mickle	182-199

- Maps:**
 Geological map (colored) of part of the Cobalt area, scale 400 feet to one inch, with contour intervals of 10 feet.
 Geological map (colored) of Cobalt-Nickel-Arsenic-Silver area, near Lake Temiskaming, Ontario, scale one mile to one inch.
 Index map (uncolored) showing mining properties in Coleman.
 Plan (uncolored) of Bloom lake area.

BULLETINS

- No. I. The Gold Fields of Western Ontario, 1896. A preliminary report by Prof. A. P. Coleman, Ph.D.
 No. II. Anthracitic Carbon or Anthraxolite, 1896. By Prof. A. P. Coleman. Republished under the title of "Anthraxolite or Anthracitic Carbon" in the Sixth Report.
 No. III. Michipicoton Mining Division, 1897. A Preliminary Report by Arthur B. Willmott, M.A., B.Sc. Re-published in Seventh Report, Part II.
 No. IV. Mineral Production of Ontario for 1901. By Thos. W. Gibson.
 No. V. Peat Fuel: Its Manufacture and Use, 1900. By W. E. H. Carter, B.A., Sc. Re-published in Twelfth Report.
 No. VI. Mineral Production of Ontario for 1903. By Thos. W. Gibson.
 A separate volume under the title "The Gold Fields of Ontario" was published in 1897. Its contents were "Second Report on the Gold Fields of Western Ontario," by Dr. A. P. Coleman, "A Tour of Inspection in Northwestern Ontario," by A. Blue, (both re-published from the Fifth Report of the Bureau), "The Gold Fields of Western Ontario," (being Bulletin No. 1), and a short general introduction, by Mr. Blue.

EXPLANATION OF INDEX

This Index includes references to the following publications :—

Report of the Royal Commission on the Mineral Resources of Ontario, referred to as		R. C.
Reports of the Bureau of Mines :		
Volume I, 1891.....	"	Vol. i
II, 1892.....	"	ii
III, 1893.....	"	iii
IV, 1894.....	"	iv
V, 1895.....	"	v
VI, 1896.....	"	vi
VII, 1897 ; parts i, ii and iii.....	"	vii
VIII, 1899.....	"	viii
IX, 1900.....	"	ix
X, 1901.....	"	x
XI, 1902.....	"	xi
XII, 1903.....	"	xii
XIII, 1904, part i.....	"	A xiii
" ii.....	"	B xiii
XIV, 1905, part i.....	"	A xiv
" ii.....	"	B xiv
" iii.....	"	C xiv
XV, 1906, part i.....	"	A xv
" ii.....	"	B xv
XVI, 1907, part i.....	"	A xvi
" ii, <i>See</i> Appendix.....		
Bulletin I. The Gold Fields of Western Ontario.....	"	Bull. i
II. Anthracitic Carbon or Anthraxolite.....	"	Bull. ii
III. Michipicoton Mining Division.....	"	Bull. iii
IV. Mineral Production of Ontario for 1901.....	Included in	Vol. xi
V. Peat Fuel : Its Manufacture and Use.....	"	xii
VI. Mineral Production of Ontario for 1903.....	"	xiii

NOTES

All places referred to in this Index are in Ontario unless otherwise mentioned.

The rulings of the Geographic Board of Canada have been adopted for the orthography of all places in the Dominion.

For purposes of more exact reference certain areal names are used in the Index that are not the names of judicial or mining divisions, but refer to areas covered by published geological sheets. These are:

Manitou district, comprising that part of Rainy River district to the east of the Lake of the Woods and north of Rainy lake, extending from Hawk Lake Station to Taché station on the Canadian Pacific railway, and from the foot of Manitoulin lake to a few miles north of the railway.

Seine River district, comprising that part of Rainy River district lying to the north of Hunter island, and extending from the boundary of Thunder Bay district westerly nearly to Rainy lake.

Shebandowan district, comprising that part of Thunder Bay district lying between its western boundary and Thunder Bay and extending north and south between Carlstadt station and Port Arthur.

ABBREVIATIONS

Alg.—District of Algoma.

B.C.—Province of British Columbia.

C.P.R.—Canadian Pacific Railway.

G.T.R.—Grand Trunk Railway.

H.B.C.—Hudson's Bay Co.

Kee.—Provisional district of Keewatin.

Lab.—Labrador and the provisional district of Ungava.

Man.—Province of Manitoba.

N.B.—Province of New Brunswick.

N.S.—Province of Nova Scotia.

Nip.—District of Nipissing.

Ont.—Province of Ontario.

R.C.—Royal Commission on the Mineral Resources of Ontario.

R.R.d.—Rainy River district.

Th.B.d.—Thunder Bay district.

University	115	Occurrences of, known in 1890...	156
Victoria	114	Production of	20, 116
Violet	115	Value of	15
Watts	91	Nickeliferous pyrrhotite	3, 163
Wright	115	Nickel pyrites	158
Mirador mine, Mexico	166	Nicol, Prof. Wm.	7, 11
Mispickel	4, 6, 32, 155	Nipissing mine, described	99
Analyses of	9	Lamprophyre on	54
In Lake Superior silver deposits	155	Nipissing mining company	3, 12, 15
Mine at Deloro	170	Norite, Sudbury	60, 65, 163
Near Lake Temagami	32	Norway, cobalt deposits of	162
Mispickel mines:		Notes on minerals	6
Big Dan	32	Nova Scotia mine, described	102
Little Dan	32	Rocks at	3, 18, 29
Molybdenite	162, 165	Veins at	28
Monopoly, cobalt	184	Nugget claim	61
Montreal river, ores of	3, 36, 67	Nuggets of silver	13
Keewatin	47	N.W.-S.E. water system	36
Area described	117, 138	Origin of	38
Moose or Quinze river	43	Obabika lake	37
Moose Horn mines	126	Old Bill lake	127
Morin lake	125	O'Brien mine	16
Mountain portage	34	Described	102
Mount McKay, section through ..	40	Diabase	62
Mud lake diabase	63	Octahedron of smaltite	12
Muggleley concentrator	97	Olivine	163
Munroe claims	127	Olivine diabase	44, 65, 124
Murray claim in Casey	131	Ophitic texture	45, 61
Nancy-Helen mine	97	Ore buyers	20
Native silver	4, etc.	Oregon, Grant Co., ores	165
Arsenic	5	Ore Reduction Co.	105
Bismuth	4, 9, 12	Ore shipments	15, 116
Elements	4	Ores, cobalt silver:	
Of Montreal river area	124	Analyses of	15
N.E.-S.W. water system	37	Distribution of	30
Origin of	38	In diabase	29
New Caledonia, cobalt deposits of...	162	In Huronian	10
Competition of, with Ontario...	166	In Keewatin	31

	PAGE.
Origin of. 3, 26, 41, 59, 60, 125, 151, 165	
Periods of deposition of	39
Orford works	18, 21
Origin of cobalt-silver ores	
<i>Preface.</i> 3, 26, 41, 59, 60, 125, 151, 165	
Origin of water systems	38
